

Pesticide Notice

New York State Education Law Section 409-H requires all public and non-public schools provide you with information regarding the potential use of pesticides periodically throughout the school year.

The district is required to maintain a list of persons in parental relation, faculty and staff who wish to receive 48-hour prior written notification of certain pesticide applications.

The district makes every effort to use only the following pesticide applications, which are NOT subject to prior notification:

1. Mouse bait in tamper resistant stations
2. Granular Ant bait
3. Gel Baits
4. Aerosol products with a directed spray in containers of 18oz. or less (wasp & hornet spray).

In the event of an emergency application necessary to protect against imminent threat to human health, a good faith effort will be made to supply written notification to those on the 48-hour notification list. If you would like to receive 48-hour prior notification of pesticide applications, please contact the Pesticide Representative at 569-5200, ext. 5244.

AHERA

AHERA is a federal law enacted in 1987, which requires all school districts to

re-inspect school facilities for asbestos-containing materials. Our facilities have been inspected and response actions are planned to insure a continued safe environment for our students and employees. Activities include training of maintenance staff to prevent disturbances of asbestos and periodic re-inspection and surveillance activities by trained personnel. Details of such activities are described in the district's AHERA Management Plan, which is available for your review in the District Office of the Main Street School, 8272 Main Street.

District FERPA Policy is available online at www.hammondsportcsd.org
